

SPECIAL PERSONALITY

It is well known in spiritual history of humanity that God descends in the human form to restore the balance as Avatars. They are essentially governed by the principle of rectifying the defects that have crept in the life which distort the Natural Order. They ruthlessly go through their work and do not mind to destroy the evil.

However, human history has also witnessed the arrival of many saints and reformers who try to mend the ways of life the human and try to reason it out with them and attempt restoration of the Order.

Saints have always been there and will continue to be there. The need for the descent is something that is rare and it is only at the Nature's cry the Divine descends as an Avatar.

The modern times are such that the task of restoration of the Order is beyond the scope of the Saints and the time is too early for an Avatar like that of Lord, Sri Krishna. This can be well understood that in spite of so many

Saints like Ramana Maharshi, Aurobindo, Sri Ramakrishna Pramahansa and Swami Vivekananda and many more such personalities who visited us during the last century and the current century there has not been any substantial change in the mode of living of the man who seems almost to be condemned to greed, avarice, competition and exploitation with, of course, the resultant agitated mind without peace and quiet. The Order needs to be restored badly and urgently.

The Nature's Answer to that need is the structuring of a personality which has surpassed the limitations of self of any type and kind - a personality of Void. That is Sri Ramchandrajji Maharaj of Shahjahanpur, Uttar Pradesh, India.
